

Use IO-Link FWBD App. Tester

Universal · Smart · Easy

1798

Overview

The IO-Link Profile BLOB Transfer & Firmware Update Specification Version 1.1 September 2019 specifies an update procedure for IO-Link Devices. The update procedure must be implemented by a Software Application that has control over an IO-Link Master. Test procedures for that Software application have been specified.

To execute these test procedures, a special Device, the FWUP App Tester, has been specified.

TEConcept has developed a compliant Test Device including all required test files.

Advantages

- Assures correct operation of FWUP Application
- Checks for correct error handling
- Reduces risk for malfunction in the field
- Visual indication of current firmware variant

FWBD App. Tester Features

- Test system for semi-automatic, reproducible Link Master tests according to IO-Link Profile BLOB Transfer & Firmware Update Specification Version 1.1 September 2019
- Verification of good case
- Verification of error handling
- Approved by IO-Link community

Deliverables

- FWBD App. Tester Hardware
- Five different firmware variants for test
- Manual as PDF
- Maintenance for 1 year
